

Tool Reconditioning

We design and manufacture our tools to provide maximum performance and tool life. We also provide factory reconditioning services. Using our reconditioning services guarantees performance you can depend on and can drive your return on investment.

Our Process

Tools are reground on the same state-of-the-art CNC equipment as originally manufactured. Tools are sent through a rigorous before and after coating inspection process.

Special Request Capabilities

In addition to reconditioning, tool modifications are also available:

- End work only
- Cutting diameter only
- Recoating
- Monitoring your specified “minimum length of cut” requirements
- Current resharping count marked on the shank
- Additional modifications during reconditioning

Reconditioning Terms & Conditions

- Minimum 3/8” tools and larger
- Helical Solutions tools only
- Minimum order quantities may apply
- Reconditioning form can be downloaded from our website
